

**Heritage & Urban Form Sub-Committee
Homework: Cultural Resources List**

Please return to staff by the July 21 Committee Meeting

What should be on a “Cultural Resource List?” What are local historic, aesthetic, and cultural aspects of the human environment? Consider:

1. Archaeological sites
2. Historic structures
 - a. Anything in the NHPA as a historic property
 - b. Anything on the National Register for Historic Places
3. Culturally important areas
 - a. Native American Sacred Sites
 - b. Impacts on culturally important areas, subsistence, or social practice

List local resources that should be considered:

Structures?

Districts?

Landmarks?

What elements of our community deserve special protection?

What resources do we already have that could help create a cultural resources list?

What entities or people could be good resources/partners in the creation of a cultural resources list?

Review previous Comp Plan documents such as the 1991 Downtown Georgetown Element, 1991 Historic Resource Management Element, and 2006 Urban and Rural Land Use Elements. What proposed districts or small area plans recommended in previous Comp Plans should be pursued? What do you think should be the priorities in establishing any of these districts? What should the Comp Plan “Action Items” be?
